

Audiometry Skills Workshop

Pre-conference Skills Workshop

CONDUCT AUDIOMETRY, PERFORM OTOSCOPY AND MANAGE HEARING TESTS

Conducting a hearing test looks simple enough but there is more going on than meets the eye. Research reveals that formal training produces accuracy, competence and confidence in practitioners and enhances the quality of service provision.

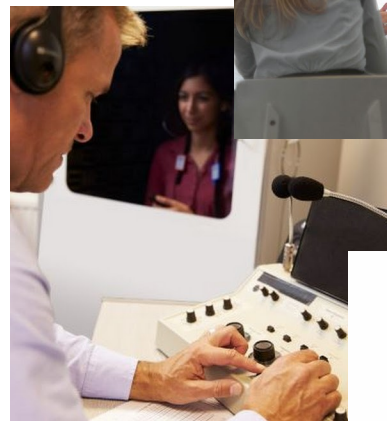

This 1-day workshop, conducted by Glenn Johnson from The Hearing Company, provides hands-on training in the basic skills required to conduct hearing tests on adults, primarily within general practice and health assessment organisations.

Delegates will learn how to conduct audiometry, perform otoscopy and manage the numerous elements that can affect the accuracy of hearing test results. They will achieve a basic understanding of the skills and knowledge required to be an audiometric tester with confidence in applying the skills in the workplace.

The course combines theory and practical training in a compact format, utilising a range of teaching methods and materials including:

- Informative lectures
- Practical workbook exercises
- Industry examples from experienced testers
- Demonstrations and role plays
- Hands-on practice session (audiometry and otoscopy)

A course manual and use of equipment in practice sessions is provided.

Course Presenter:

*Glenn Johnson, Principal Audiologist and Consultant,
The Hearing Company*

WHEN: Thursday, 19 March 2020, 8.00am-5.00pm | **WHERE:** Peppers Silo Hotel | **PRICE:** \$300 for ANZSOM & AFOEM Members, \$400 for non-members | Morning tea, lunch and afternoon tea will be provided.
